Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 8 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 201 09 379.

With reference to claims 1 – 2, 5 – 8 and 12, '379 discloses a surgical instrument for treatment of female urinary incontinence, the surgical instrument comprising: a) a curved needle-like element manufactured from a material resistant to standard sterilization techniques and having a first and a second end, each of the first and second ends of the curved needle like element having an eye therethrough; and b) a handle having a first and second end, the first end having a gripping mechanism attached thereto for enabling a person to hold and manipulate the handle, the second end of the handle having a coupling means for releaseably securing the first end of the curved needle-like element to the handle; wherein a tape to be implanted into a female body as a loop around urethra is passed through one of the eyes in the curved needle like element and subsequently drawn into the body thereby implanting the tape within the body as set forth on pages 1 – 2 of the translation and in the figures.

With reference to claim 3, see figures 3 and 4.

Regarding claim 4, see figure 5.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 – 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE 201 09 379.

The difference between DE 201 09 379 and claims 9 – 11 is the provision that the instrument includes a specific coupling means.

It would have been obvious to one of ordinary skill in the art to substitute one coupling means for another in order to determine the most effective product since the substitution of one coupling means for another is within the level of ordinary skill in the art.
